

Save Onteora Lake, Pickerel Pond and Bluestone Wild Forest

PETITION

As residents of the Town of Kingston, we call on the Town of Kingston Planning Board to recognize the local and regional character and the economic benefits of recreational use of Onteora Lake, Pickerel Pond, and the Bluestone Wild Forest and to conduct a thorough and rigorous environmental review of the proposed steel and concrete fabrication plant at 850 Route 28, specifically by issuing a Positive Declaration of significance and requiring a full Environmental Impact Statement.

We also call on the Town Board and the Planning Board to retain the Town's existing MU-2 zoning at 850 Route 28 instead of re-zoning to encourage heavily industrial activities. We urge the Town Board and Planning Board to conduct an in-depth survey of town residents to guide updates to the Town's Comprehensive Plan and to make the results of the survey publicly available prior to adopting revisions to the Comprehensive Plan and prior to making any zoning changes.
